Approval Sheet For Product Specification

Issued Date: 3/16/2006 (REV. NO: 5)

Product Name: SMD 3.2x2.5 19.2MHz VCTCXO

TST Parts No.: TX0131A

Customer Parts No.: _____

Company: _____
Division: _____
Approved by: _____
Date: _____

Checked by: _____ CC Hsu

Approval by: _____ TF Yang

Date: _____ 3/16/2006

SMD 3.2x2.5 19.2MHz VCTCXO

MODEL NO.: TX0131A

REV. NO.: 5

Features:

- Ultra Miniature SMD Package
- Good Frequency Stability
- Good Phase Noise Response

RoHS Compliant
Lead free
Lead-free soldering

Description and Applications:

Surface mount 3.2mmx2.5mm VCTCXO for use in wireless communications devices

Electrical Specifications:

TX0131A	Specifications
Nominal Frequency, Fo	19.200000 MHz
Storage Temperature Range	-40°C to +85°C
Operating Temperature Range	-20°C to +75°C
Power Supply Voltage, Vcc	2.8 V
Output Voltage with Load 10pF//10KΩ, Vout	0.8 Vp-p min
Output Waveform	Clipped Sinewave
Power Supply Current, Icc	2.0 mA max
Control Voltage, Vcon	1.4 +/- 1.0 V
DC Terminal Input Impedance	100K ohms min
Frequency Tolerance (Vcon=1.4V) after Two Reflows	+/- 2 ppm max @ 25°C +/- 3°C
Frequency Stability	
a. Vs. Temperature (-20~75°C)	+/- 2.5 ppm
b. Vs. Load varied 10pF//10KΩ+/-10%	+/- 0.2 ppm
c. Vs. Supply Voltage varied 2.8+/-5%	+/- 0.2 ppm
Vcon Frequency Control Range (1.4+/-1.0 V)	+/-8 ~ +/-14 ppm
Start Up Time (90% of final RF level in Vp-p)	2.0 msec max.
Harmonics	-5.0 dBc max
SSB Phase Noise (@1KHz Carrier Offset)	-130 dBc/Hz max
Aging	+/-1.0 ppm/year @25°C

Mechanical Dimensions (mm):

PIN OUT FOR VCTCXO	
PIN	PIN CONNECT
1	Vt
2	GND/CASE GND
3	Fout
4	Vdd

Marking:

- Line 1: Customer Frequency (19.20)
- Line 2: TST Logo + Crystal Product Code + Date Code

Reflow Profile:

Notes of the Usage:

1. Touch the solder iron at 260 ± 5 deg C onto the leads for 10 ± 2 sec max or touch the solder at 350 ± 5 deg C onto the leads for 3 ± 0.5 sec.
2. In the customer's reflow process, if it will remain some mechanical stress at the soldering terminals, also make some cracks on the soldering termination. Some cracks will cause open or short circuit and cause of thermal increasing or smoking. Don't make any excess mechanical stress to soldering points.
3. In case of giving a heavy shock to the products, it may make an open or short circuit and cause of thermal increasing and smoking. To avoid heavy shock impact applying to products is strictly required.

Notes of the Storage:

1. To keep products under the condition at the room temperature ($-5 \sim 35$ deg C) with normal humidity (45~75%). Absorption of moisture and dewdrop may make inferiority of characteristics and a short circuit.
2. Oxidization of terminals shall make the solderability more inferior. Dusts and corrosive gas will make a cause of the open or short circuit. Keep it in the clean place where is not in dusty and no corrosive gas.
3. Use the anti-static material to the storage package.
4. Don't put any excess weight to the VCTCXO in the storage process.

5. Don't move the product from the cold place to the hot place in the short time, otherwise it may make some dew-drop, then a short circuit may happen in case.
6. Storage periods should be maximum 6 months under condition of above item 1 after delivery from TST factory.
7. Once open the bag, there is possibility of electrical characteristics deterioration due to absorption of moisture. So, please use parts within 7 days after opening the bag.
8. If you have to keep parts without using after opening the bag, please put the drying agent in the bag, fold the bag and keep it in the place where temperature and humidity are controlled (nitrogen atmosphere box etc.)
