UNITED  
CHEMI-CON

- Miniature
- Long Life
- Solvent Proof
- +125°C Maximum Temperature

The GXD series capacitors are new miniature high temperature capacitors from United Chemi-Con. These capacitors are designed for use in very high temperature applications such as automotive engine controls. These capacitors are downsized from the previous high temperature GXC series and depending on the case size have a longer rated lifetime than the previous parts.

The GXD series capacitors were developed to withstand HCFC cleaning agents for five minutes by ultrasonic, vapor or immersion. This solvent proof design allows all circuit board components to be cleaned together, at the same time, without resorting to more expensive epoxy end-sealed capacitors. Refer to the Mini-Glossary for recommended cleaning conditions.
