

HA8003

General Description

The HA8003 is a K-Band low noise amplifier for applications in the 30GHz range.

The high gain, good flatness and low noise figure makes this device an ideal choice as a low noise amplifier for receiver applications in the frequency range from 30 GHz to 36GHz.

The device operates from -30°C to $+70^{\circ}\text{C}$ with a single supply voltage.
