

Power SMD LED in PLCC-2 Package

Description

The TLM.33.. series is an advanced modification of the Vishay TLM.31..series. It is designed to incorporate larger chips, therefore, capable of withstanding a 50 mA drive current.

The package of the TLM.33.. is the PLCC-2 (equivalent to a size B tantalum capacitor). It consists of a lead frame which is embedded in a white thermoplastic. The reflector inside this package is filled up with clear epoxy.

19225

Features

- Utilizing AlInGaP technology
- Angle of half intensity $\pm \varphi = 60^\circ$
- Available in 8 mm tape
- Luminous intensity and color categorized per packing unit
- Luminous intensity ratio per packing unit $I_{Vmax}/I_{Vmin} \leq 1.6$
- Thermal resistance $R = 400 \text{ K/W}$
- ESD class 2
- Lead-free device

Applications

Traffic Signals and Signs
Interior and exterior lighting
Dot Matrix Panels, Signs, Displays
Dashboard illumination
Indicator and backlighting purposes for audio, video, LCD's switches, symbols, illuminated advertising etc.

Parts Table

Part	Color, Luminous Intensity
TLMPG3300	Pure Green, $I_V = 50 \text{ mcd (typ.)}$
TLMPG3301	Pure Green, $I_V = 32 \text{ mcd to } 100 \text{ mcd}$
TLMYG3300	Yellow Green, $I_V = 130 \text{ mcd (typ.)}$

Absolute Maximum Ratings

$T_{amb} = 25^\circ\text{C}$, unless otherwise specified

TLMPG3300, TLMYG3300

Parameter	Test condition	Symbol	Value	Unit
Reverse voltage		V_R	5	V
Forward current	$T_{amb} \leq 73^\circ\text{C}$ (400 K/W)	I_F	50	mA
Power dissipation	$T_{amb} \leq 73^\circ\text{C}$ (400 K/W)	P_{tot}	130	mW
Junction temperature		T_j	125	°C
Operating temperature range		T_{amb}	- 40 to + 100	°C
Storage temperature range		T_{stg}	- 40 to + 100	°C
Thermal resistance junction/ ambient	mounted on PC board (pad size > 5 mm ²)	R_{thJA}	400	K/W

Ozone Depleting Substances Policy Statement

It is the policy of **Vishay Semiconductor GmbH** to

1. Meet all present and future national and international statutory requirements.
2. Regularly and continuously improve the performance of our products, processes, distribution and operating systems with respect to their impact on the health and safety of our employees and the public, as well as their impact on the environment.

It is particular concern to control or eliminate releases of those substances into the atmosphere which are known as ozone depleting substances (ODSs).

The Montreal Protocol (1987) and its London Amendments (1990) intend to severely restrict the use of ODSs and forbid their use within the next ten years. Various national and international initiatives are pressing for an earlier ban on these substances.

Vishay Semiconductor GmbH has been able to use its policy of continuous improvements to eliminate the use of ODSs listed in the following documents.

1. Annex A, B and list of transitional substances of the Montreal Protocol and the London Amendments respectively
2. Class I and II ozone depleting substances in the Clean Air Act Amendments of 1990 by the Environmental Protection Agency (EPA) in the USA
3. Council Decision 88/540/EEC and 91/690/EEC Annex A, B and C (transitional substances) respectively.

Vishay Semiconductor GmbH can certify that our semiconductors are not manufactured with ozone depleting substances and do not contain such substances.

**We reserve the right to make changes to improve technical design
and may do so without further notice.**

Parameters can vary in different applications. All operating parameters must be validated for each customer application by the customer. Should the buyer use Vishay Semiconductors products for any unintended or unauthorized application, the buyer shall indemnify Vishay Semiconductors against all claims, costs, damages, and expenses, arising out of, directly or indirectly, any claim of personal damage, injury or death associated with such unintended or unauthorized use.
