The TPI 100 Series of 100 Watt AC/DC power supplies features a 3000 VAC I/O reinforced isolation. Excellent efficiency of up to 92% allows a high power density for the standard 2.0" x 3.0" packaging format. The full load operating temperature range is -40°C to +50°C while it goes up to 80°C with load derating. The power supplies are designed to meet the ErP directive (< 0.3W no load power consumption).

They come with an active power factor correction and the EMC characteristic is dedicated for applications in industrial and domestic fields.

High reliability is provided by use of industrial quality grade components and an excellent thermal management. It makes the products an ideal solution for any demanding industrial devices and space critical applications.
